

**VrWallet**

WhitePaper v1.0

# Introduction

VrWallet is a decentralised Binance Smartchain & Ethereum based Web3 Mobile Wallet. The app works with several crypto tokens and blockchain wallets. It enables users to store, send and receive Smart Chain & Ethereum based tokens on the go.

These functions are designed with a focus on user experience, providing a full suite of features for naive and seasoned enthusiasts.

VrWallet offers a seamless user experience. As we believe that ease of use is vital in the adoption of cryptocurrencies, the highly intuitive and user-friendly mobile application for accessing the blockchain.

# Mission

Our mission is to create the ultimate token wallet that boost interchain and multi-chain compatibility—while providing a superior user experience through an intuitive UI. We envision a wallet that empowers individuals to access decentralised Finance (DeFi) technology.

# Vision

VrWallet believe in the future of blockchain and aims to make the interplay of blockchain more practical by making your mobile device competent for all kinds of blockchain interactions.

There are six key reasons why we believe blockchain technology is about to bring some profound changes to this industry, busting the finance monopoly, and offering individuals and institutions alike real choice in how they create and manage value.

**Attestation:** For the first time in history, two parties who neither know nor trust each other can transact and do business. Verifying identity and establishing trust is no longer the right and privilege of the financial intermediary.

**Cost:** On the blockchain, the network both clears and settles peer-to-peer value

transfers, and it does so continually so that its ledger is always up to date.

**Speed:** The shift to instant and frictionless value transfer would free up capital otherwise trapped in transit, bad news for anyone profiting from the float.

**Risk Management:** Blockchain technology promises to mitigate several forms of financial risk. Financial institutions are already using blockchain technology to record, exchange, and trade assets and liabilities, and could eventually use it to replace traditional exchanges and centralised markets, upending how we define and trade value.

**Open Source:** The financial services industry is a technology stack of legacy systems standing twenty miles high and on the verge of teetering over.

These benefits—attestation, dramatically lower costs, lightning speed, lower risks, great innovation of value, adaptability—

have the potential to transform not only payments, but also the securities industry, investment banking, accounting and audit, venture capital, insurance, enterprise risk management, retail banking, and other pillars of the industry.

In conclusion, blockchain has great functionality to offer and our vision is to use this revolutionary technology to transform people's lives in their dealings with the day to day services.

# Wallet Ecosystem

VrWallet Application works with several crypto tokens and blockchain wallets. Enabling users to store, send and receive Ethereum and Smart Chain based tokens with ease. Few important features are described below.

## Rich Token Experience

Enjoy a native-experience with TokenScript enabled tokens. Store and manage feature rich NFT Tokens, game tokens and ENS, along with your ETH and BSC currencies.

## User Friendly UI

Beginner-friendly with no hidden fees or tech background needed. Just launch the

app create your wallet and start interacting with blockchain.

## Backup & Recovery

Anybody who has your seed phrase can steal your cryptos. VrWallet provides user-friendly 12-word secure key backup, management and recovery. Biometric and pin support. VrWallet wallet utilises Secure Enclave, giving you cold

wallet level security.

## Advanced Web3 Browser

Interact and access the dApp ecosystem: DeFi, marketplaces, games and everything else directly from the Web3 Browser with Integrated interface that is fully optimised for mobile so you can enjoy the content designed specifically for your device.

# Ecosystem Overview

Create in-app wallets, store, receive and transfer token easily in a 'one stop shop' experience.

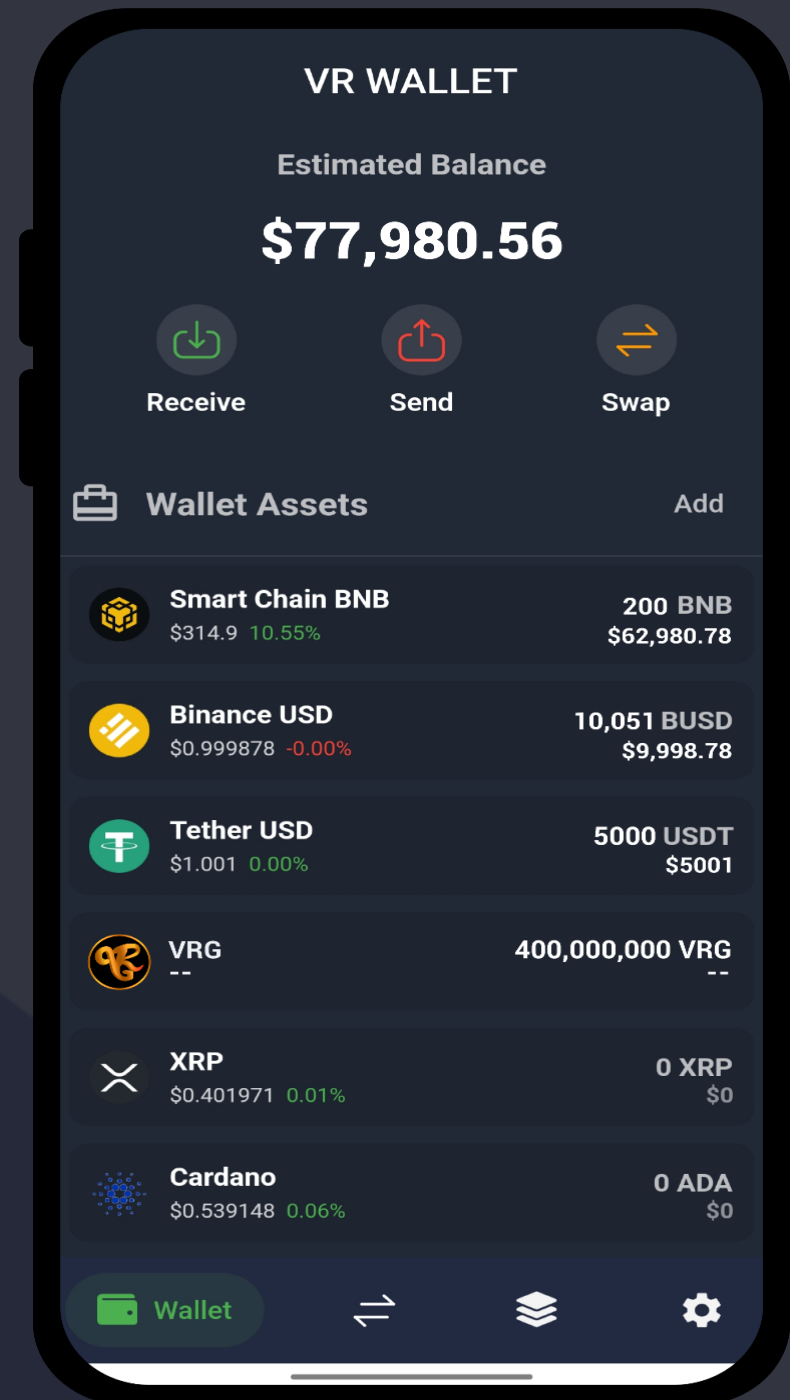

Secure your assets with Private Keys, Mnemonic Phrases, 2-Factor Authentication, and more.

Beginner-friendly with no hidden fees or tech background needed.

Browse and connect to the decentralised web sites using built in powerful Web3 browser.

# VRG Token

VRG will be the preferred token in our ecosystem. As the preferred token we plan to use the VRG Token for staking, governance, paying transaction fees and gaining eligibility in VrWallet launch pool. Let's understand them in details.

## Staking

Staking is an activity where a user locks or holds his funds in a cryptocurrency wallet to participate in maintaining the operations of a proof-of-stake (PoS)-based blockchain system. It is similar to crypto mining in the sense that it helps a network achieve consensus while rewarding users who participate.

Users will be able to stake VRG directly from your VrWallet app and the rewards will be added back to their wallet on harvesting.

## Governance

Blockchain governance happens directly on the blockchain protocol. That is, any proposed changes or decision making processes must be embedded into the network code. This type of governance empowers the platform token holders (or node controllers) to be the main force behind company decisions and submit their vote on any new developments. This system will not follow a 1-node-1-vote

principle, but rather depend on how many native coins every node is holding. On-chain governance bears the additional benefit of fast decision making, subject to a properly working design.

VRG token holders will influence decisions concerning the project such as proposing or deciding on new feature, proposals and even changing the governance system itself

## Transaction Fess

VRG powers the VrWallet ecosystem and provides discounted trading fees for users. Users can use VRG to pay for swap and transaction fees on the VrWallet Mobile Wallet.

Users can also enable/disable this function from the mobile app itself once this feature goes live.

## Mining NFTs

Non-fungible tokens took the art world by storm earlier this year. NFTs are a type of digital asset designed to show someone has ownership of a unique virtual item, such as online pictures and videos or even sports trading cards.

Minting is a fancy term for creating. Creating an NFT is actually a surprisingly simple process.

VrWallet provides an easy way to store and access all your crypto collectibles with peace of mind and security. Crypto

collectibles are secured on the blockchain and associated with a public address. Over the last few years, we have seen various versions of crypto collectibles such as CryptoPunks. VrWallet will allow VRG holders to upload and list digital artworks in the VrWallet NFT marketplace.

## LaunchPool Eligibility

VrWallet Launchpad will be a full-service launchpad for new block chain projects who want to benefit from the security and trustlessness that smart contracts can provide. VRG token holders will be eligible to participate in VrWallet launch polls.

## Our Hold to Earn NFT is going to be live Hold VRG to get our NFT

Hold **VRG** to mint our special Edition NFT  
• Holders reward

1bnb value Vrg = 2 NFT + Token reward

2BNB value vrg = 5 NFT + Token reward

5BNB value vrg = 15 NFT + Token reward

10BNB value vrg = 40 NFT + Token reward

20BNB value vrg = 80nft + token reward

100bnb value vrg = 150nft + token reward

# Use Case Overview

**Staking:** Users will be able to stake VRG directly from their VrWallet app and earn crypto rewards.

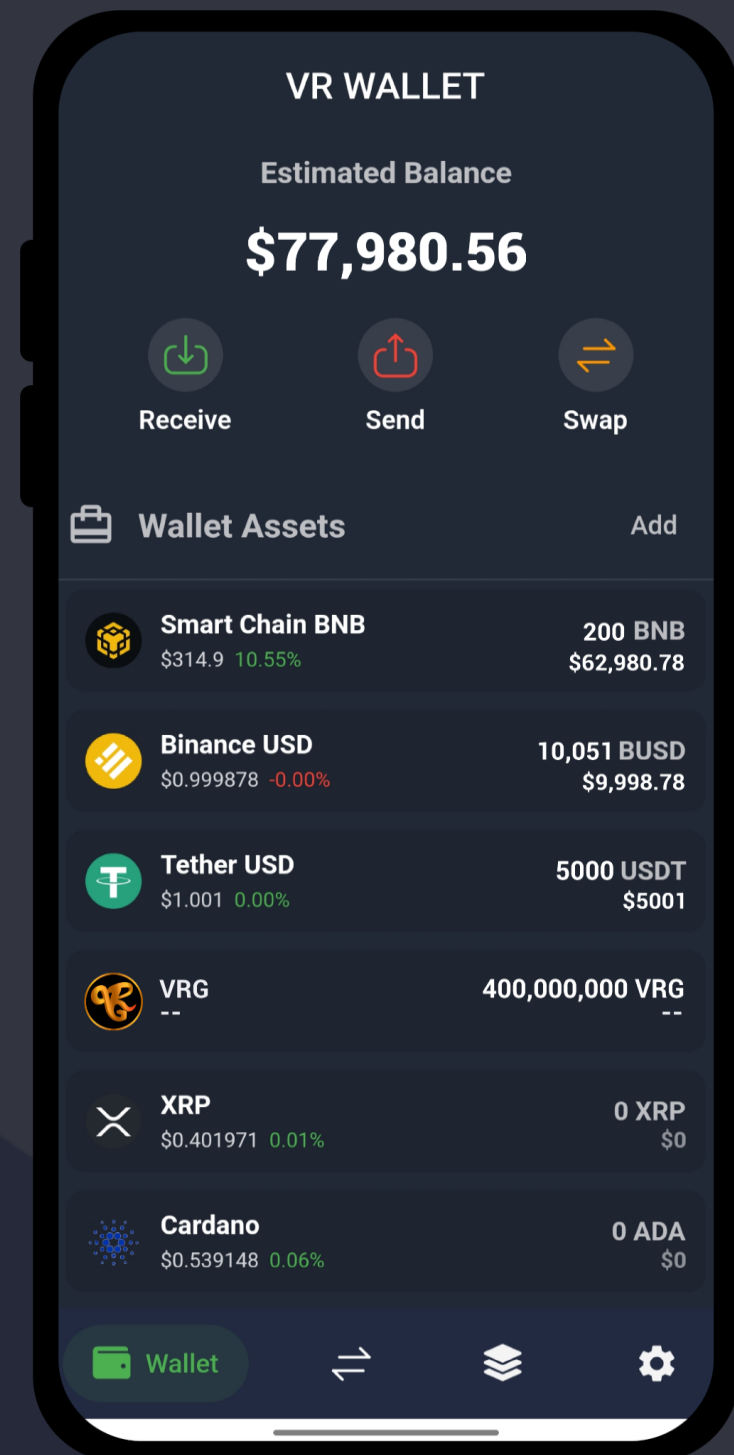

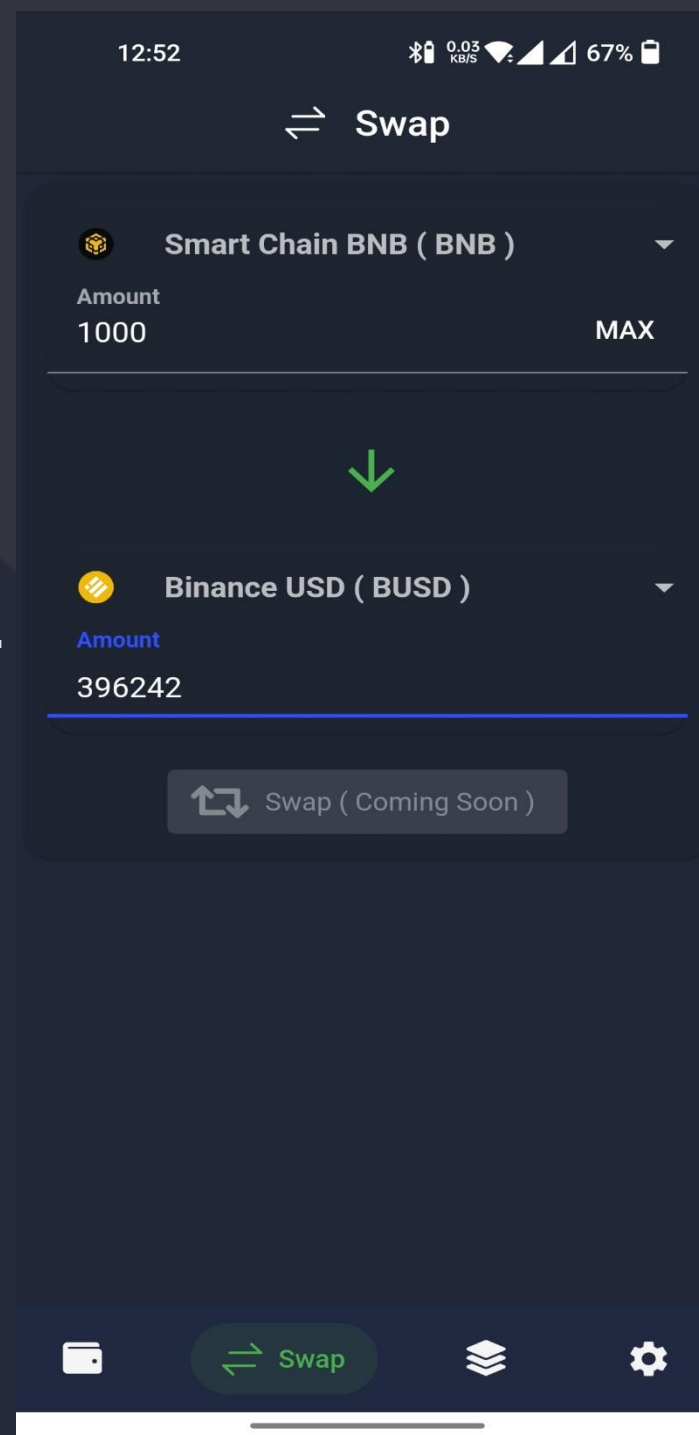

**Governance:** VRG token holders can influence decisions concerning the project.

**Fee:** VRG Token will be used for paying transaction fees.

**Launchpad:** Gaining eligibility in VrWallet launch pools.

# Token Details

Website	<a href="https://VrgWallet.com/">https://VrgWallet.com/</a>
Name	VrWallet
Symbol	VRG
Decimals	0
Type	BEP20
Network	Binance Smart Chain
Contract Address	<a href="#">0xE675b4a7849A7309EcEa6f5fb50777645635d165</a>
Maximum Supply	500,000,000

# VRG Airdrop

<b>Title</b>	<b>Airdrop</b>
<b>Token</b>	<b><u>VRG (Vr Wallet)</u></b>
<b>Airdrop Start Date</b>	<b>Soon</b>
<b>Airdrop End Date</b>	<b>Soon</b>

# Legal Disclaimer

The information provided in this publication does not constitute investment advice, financial advice, trading advice, or any other sort of advice. You should not treat any of the publication's content as such. This material is for informational purposes only and is not (i) an offer, or solicitation of an offer, to invest in, or to buy or sell, any interests or shares, or to participate in any investment or trading strategy, (ii) intended to provide accounting, legal, or tax advice, or investment recommendations, or (iii) an official statement of Vrwallet. No representation or warranty is made, expressed or implied, with respect to the accuracy or completeness of the information or to the future performance of any digital asset, financial instrument, or other market or economic measure. The Wallet Swap team does not recommend that any cryptocurrency

should be bought, sold, or held by you. Do conduct your due diligence and consult your financial advisor before making any investment decisions. By purchasing VrWallet, you agree that you are not purchasing a security or investment, and you agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the token "as is" and is not required to provide any support or services. You should have no expectation of any form from VrWallet and its team. Although VrWallet is a community-driven decentralised finance (DeFi) token for social networking and not a registered digital currency, the team strongly recommends that citizens in areas with government bans on cryptocurrencies do not purchase it because the team cannot ensure compliance with established regulations within certain territories. Always make sure that you comply with your local laws and regulations before you make any purchase.

# Risk Disclosers
